

Self-Assessment 03

We have seen how, when trying to understand texts, interaction makes everything a bit more complex. How do we interact with objects?

Questions:

1. How does interaction affect our understanding of texts?
2. What are some ways we interact with objects?
3. Is there a specific way we should use objects?
4. What is an example of an object we interact with in a one-sided way?
5. In what ways do we interact with texts?
6. Can you explain the difference between passive and active ways of interacting with texts?

Take for instance literature. We interact with it in a very one-sided way. Usually, with texts, we interact with things in either a passive or an active way.

Questions:

1. How do we interact with literature in a one-sided way?
2. What are some examples of passive ways of interacting with texts?
3. What are some examples of active ways of interacting with texts?
